

LAE OLDMEADOW

ARTIST STATEMENT

My technical training as an Upholsterer has significantly contributed to the unique appearance and crafting of my work, which takes nature as my inspiration, material and concept.

Accordingly, this sewn and upholstered wall canopies are highly sculptural and robust.

Their organic forms and constructed nature, transforms the found materials into objects which have mesmerising qualities for me as an artist.

My discovery of plant life construction, its beauty and strength, I hope to honour age old traditions which fuse the shared environment of nature and humanity.
